

THE 4 USE CASES OF OPEN DATA IN PUBLIC CONTRACTING

www.open-contracting.org
@opencontracting

Open Contracting Partnership

**Public contracts are governments
number one corruption risk.**

NUMBER ONE

1 GOVERNMENTS NUMBER 1 CORRUPTION RISK

57%

Foreign bribery cases prosecuted under the OECD Anti-Bribery Convention involved bribes to obtain public contracts

>30%

Companies participating in EU public procurement say corruption prevented them from winning a contract (2013 Eurobarometer)

20-25%

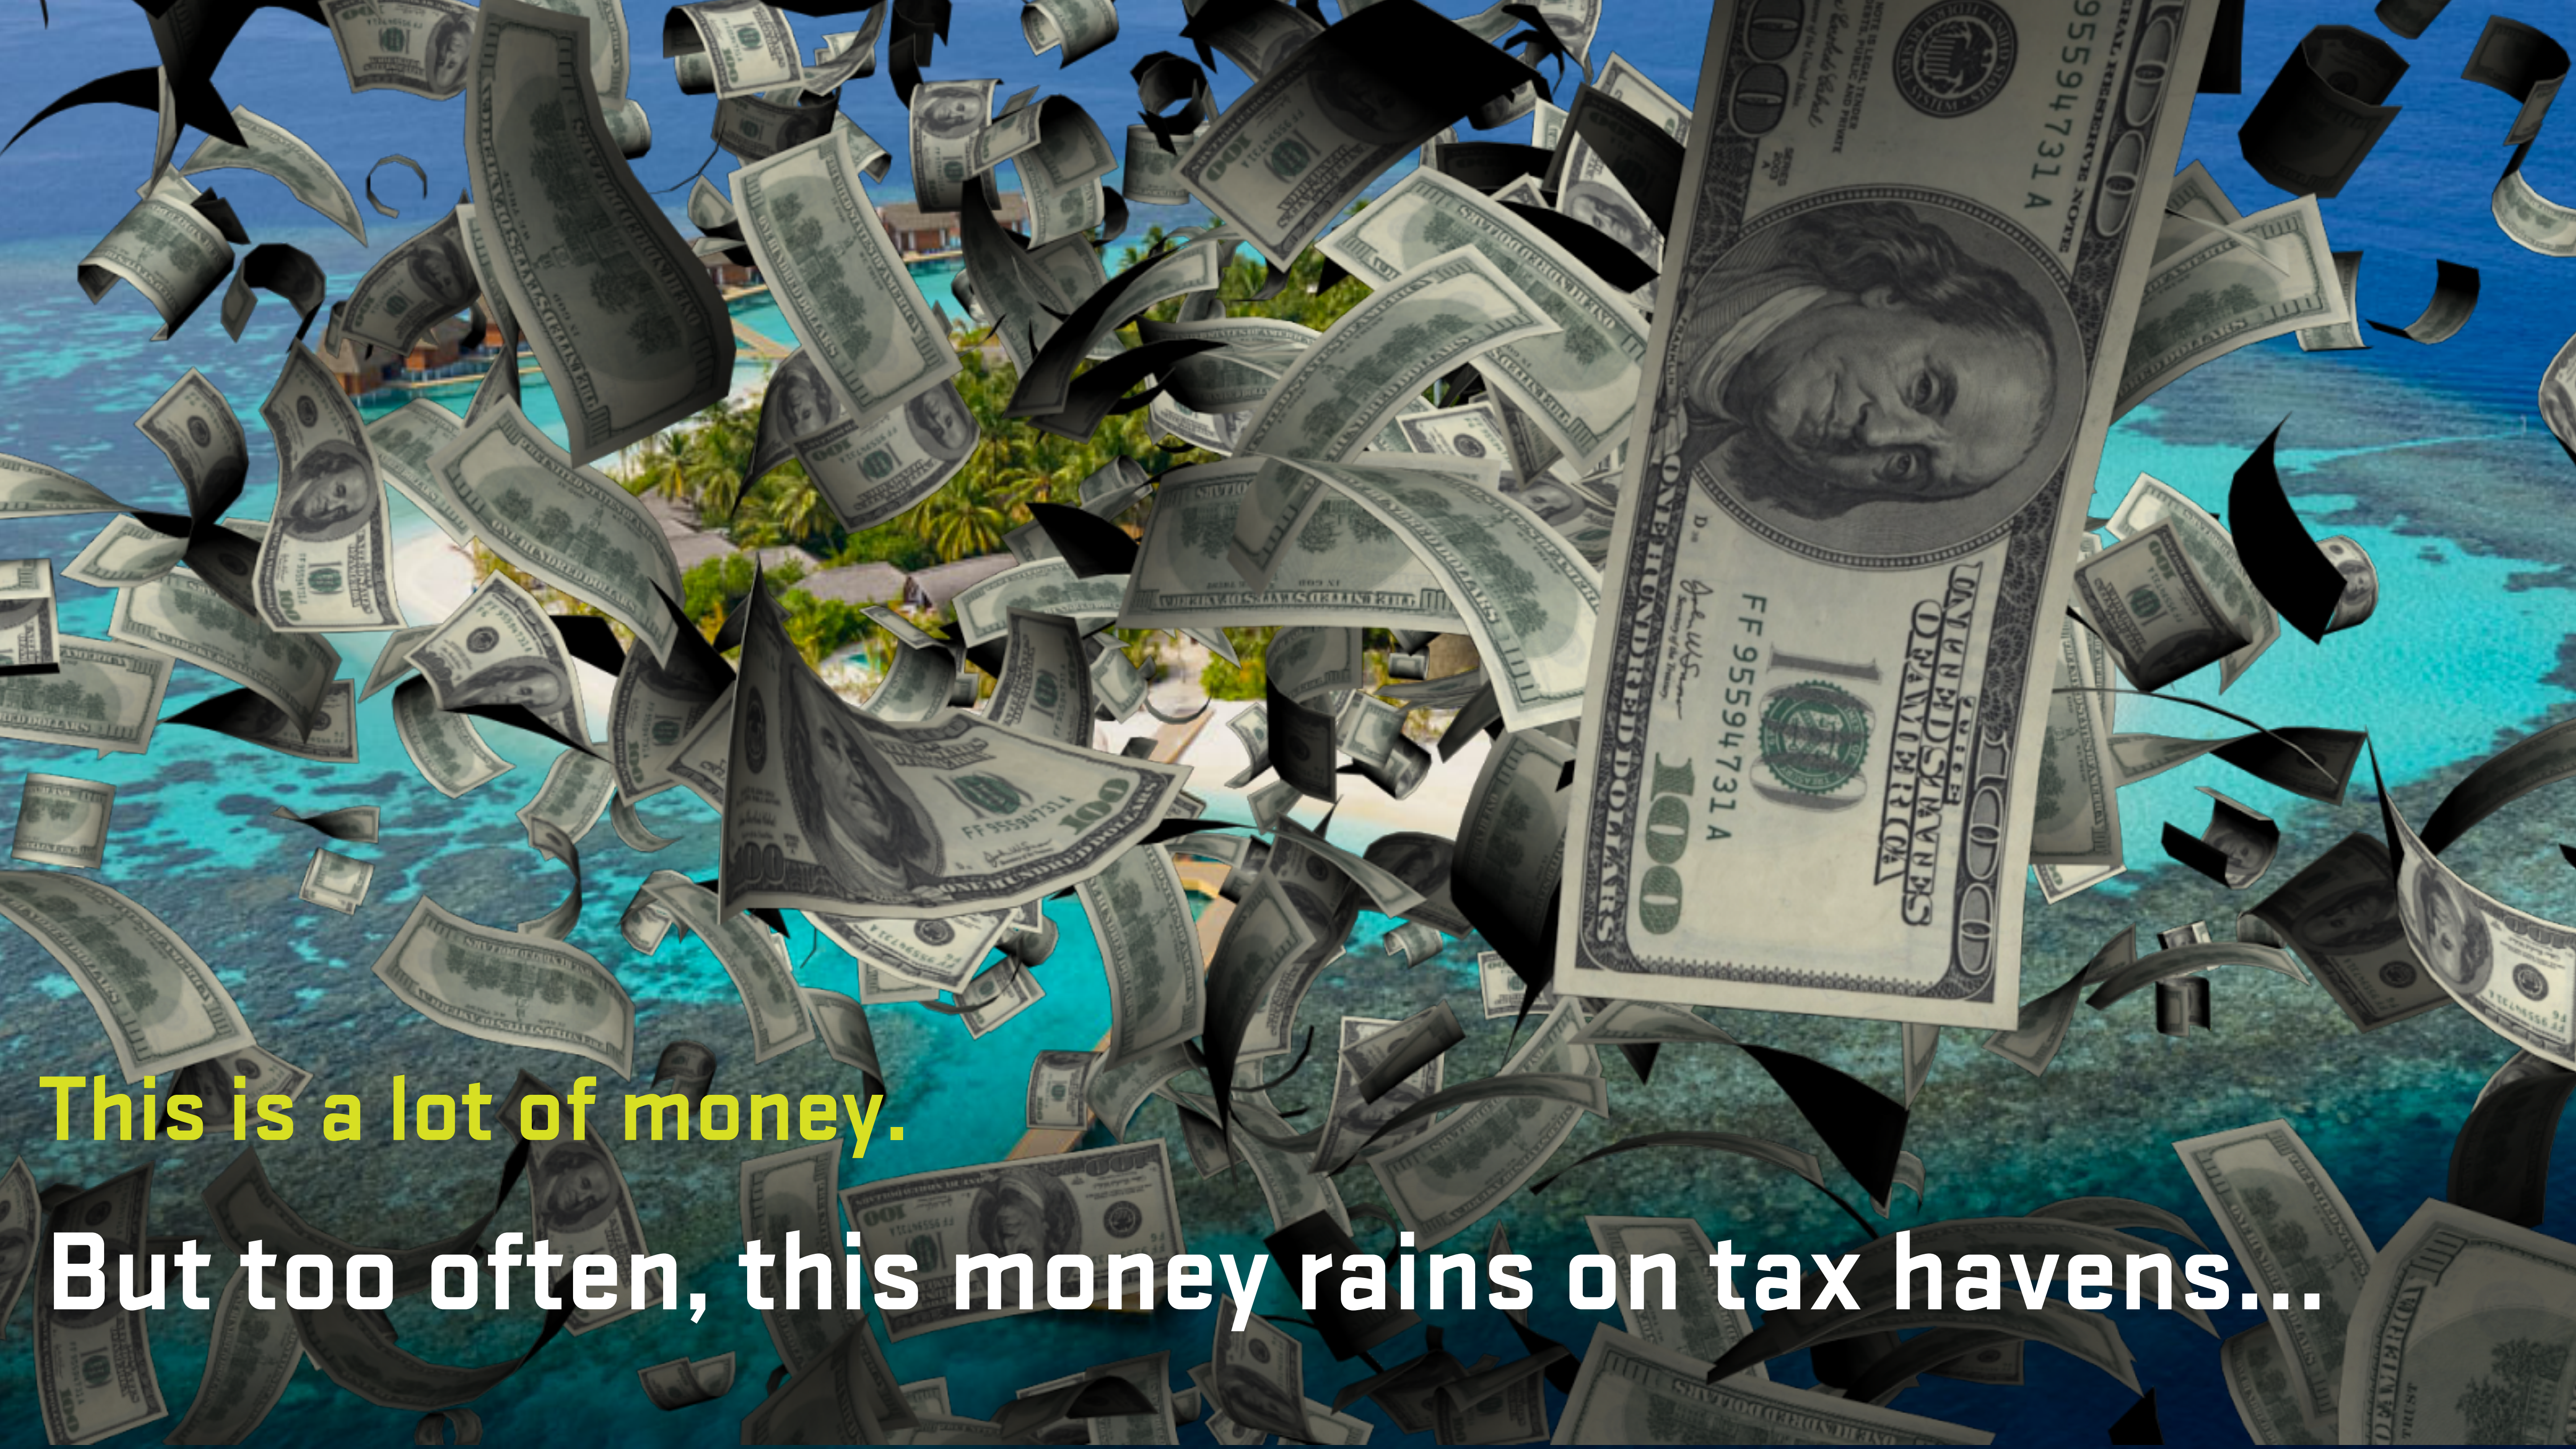

Corruption and fraud may amount to 20-25% of procurement budgets (UNODC)

**GEORGIA,
2010**

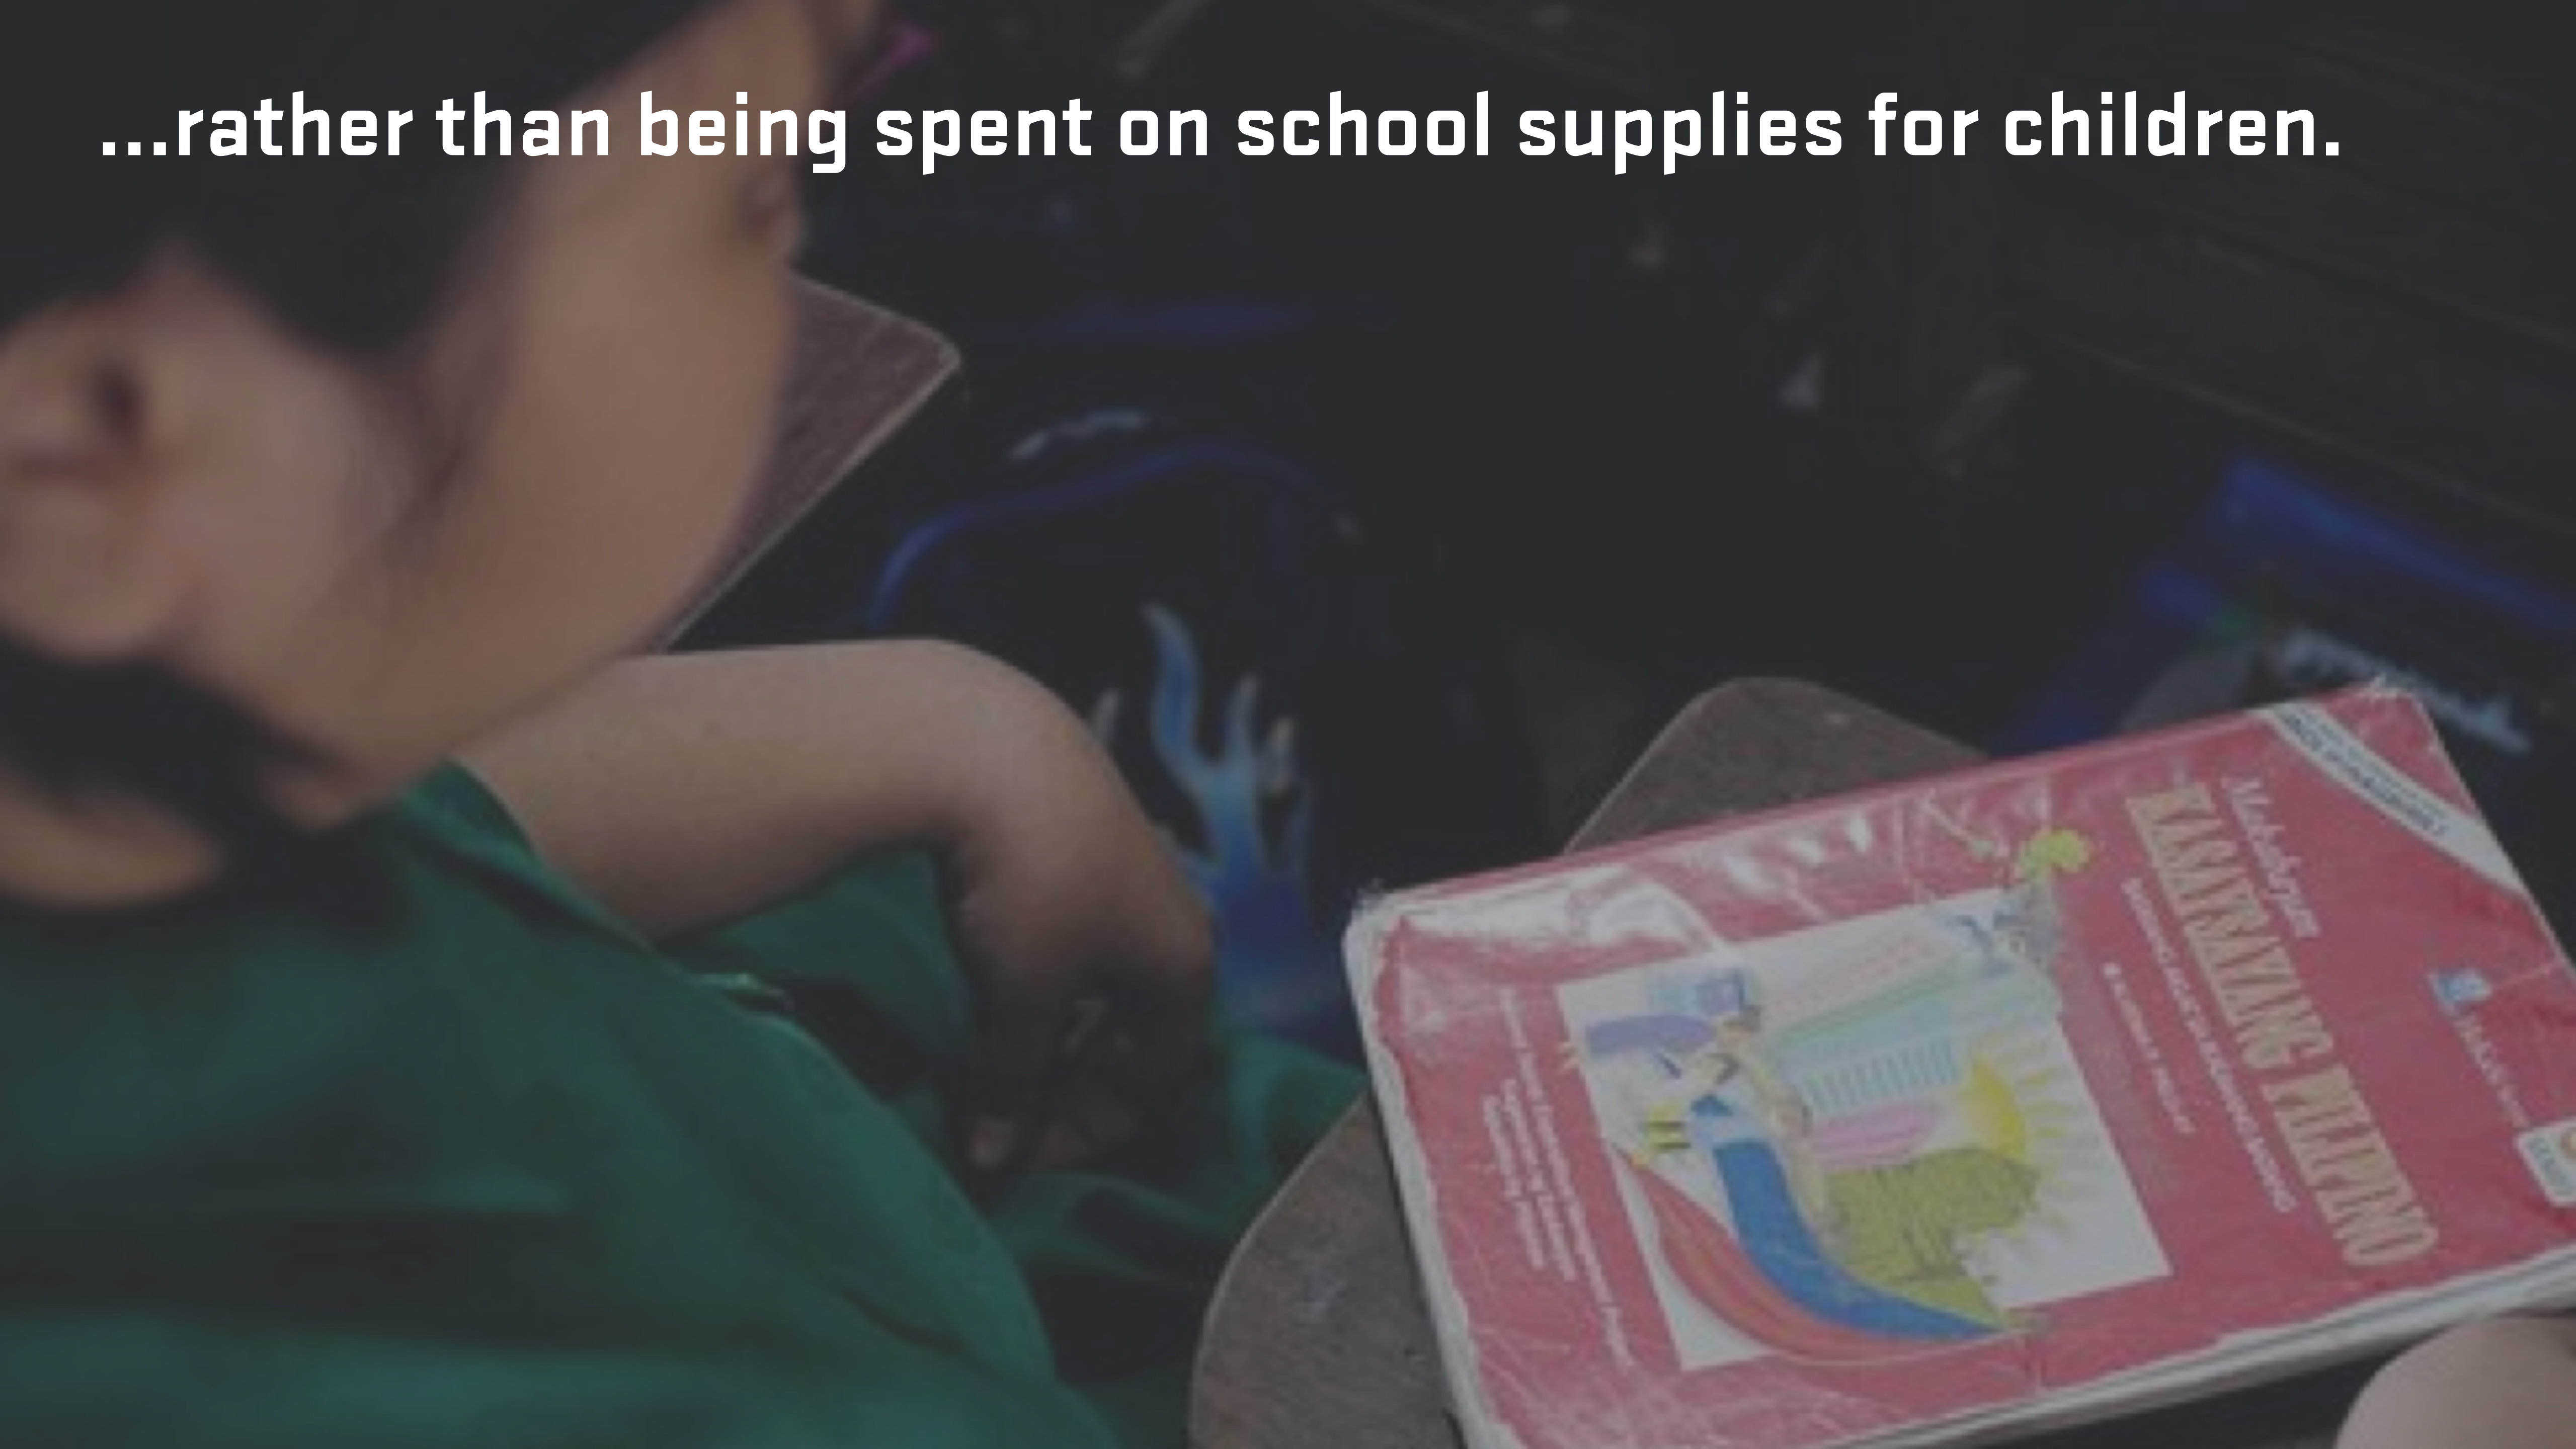

US\$9,500,000,000,000

This is a lot of money.

But too often, this money rains on tax havens...

...rather than being spent on school supplies for children.

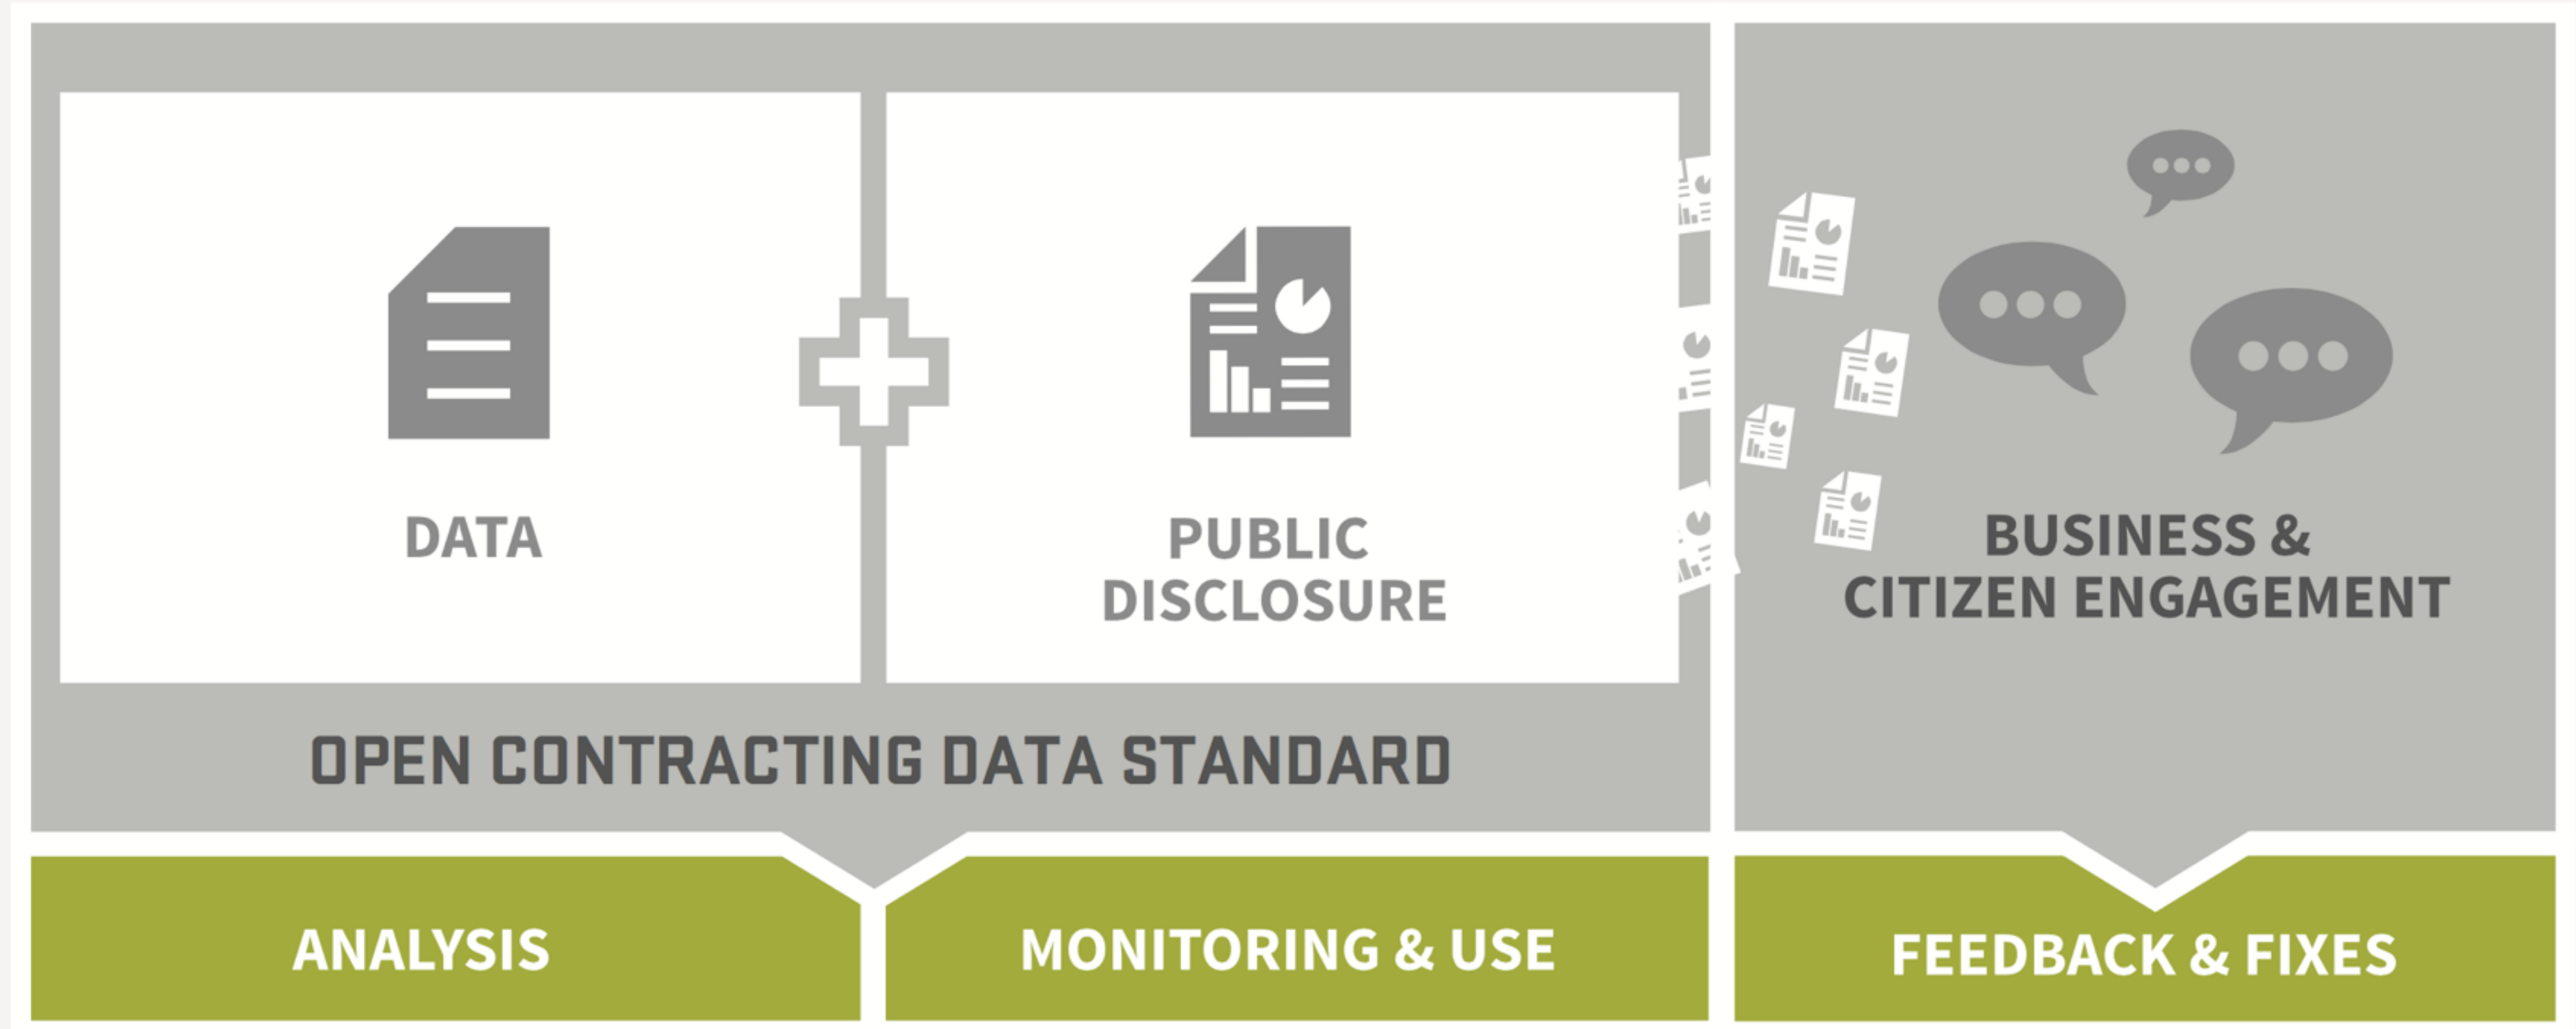

Our approach

Innovation

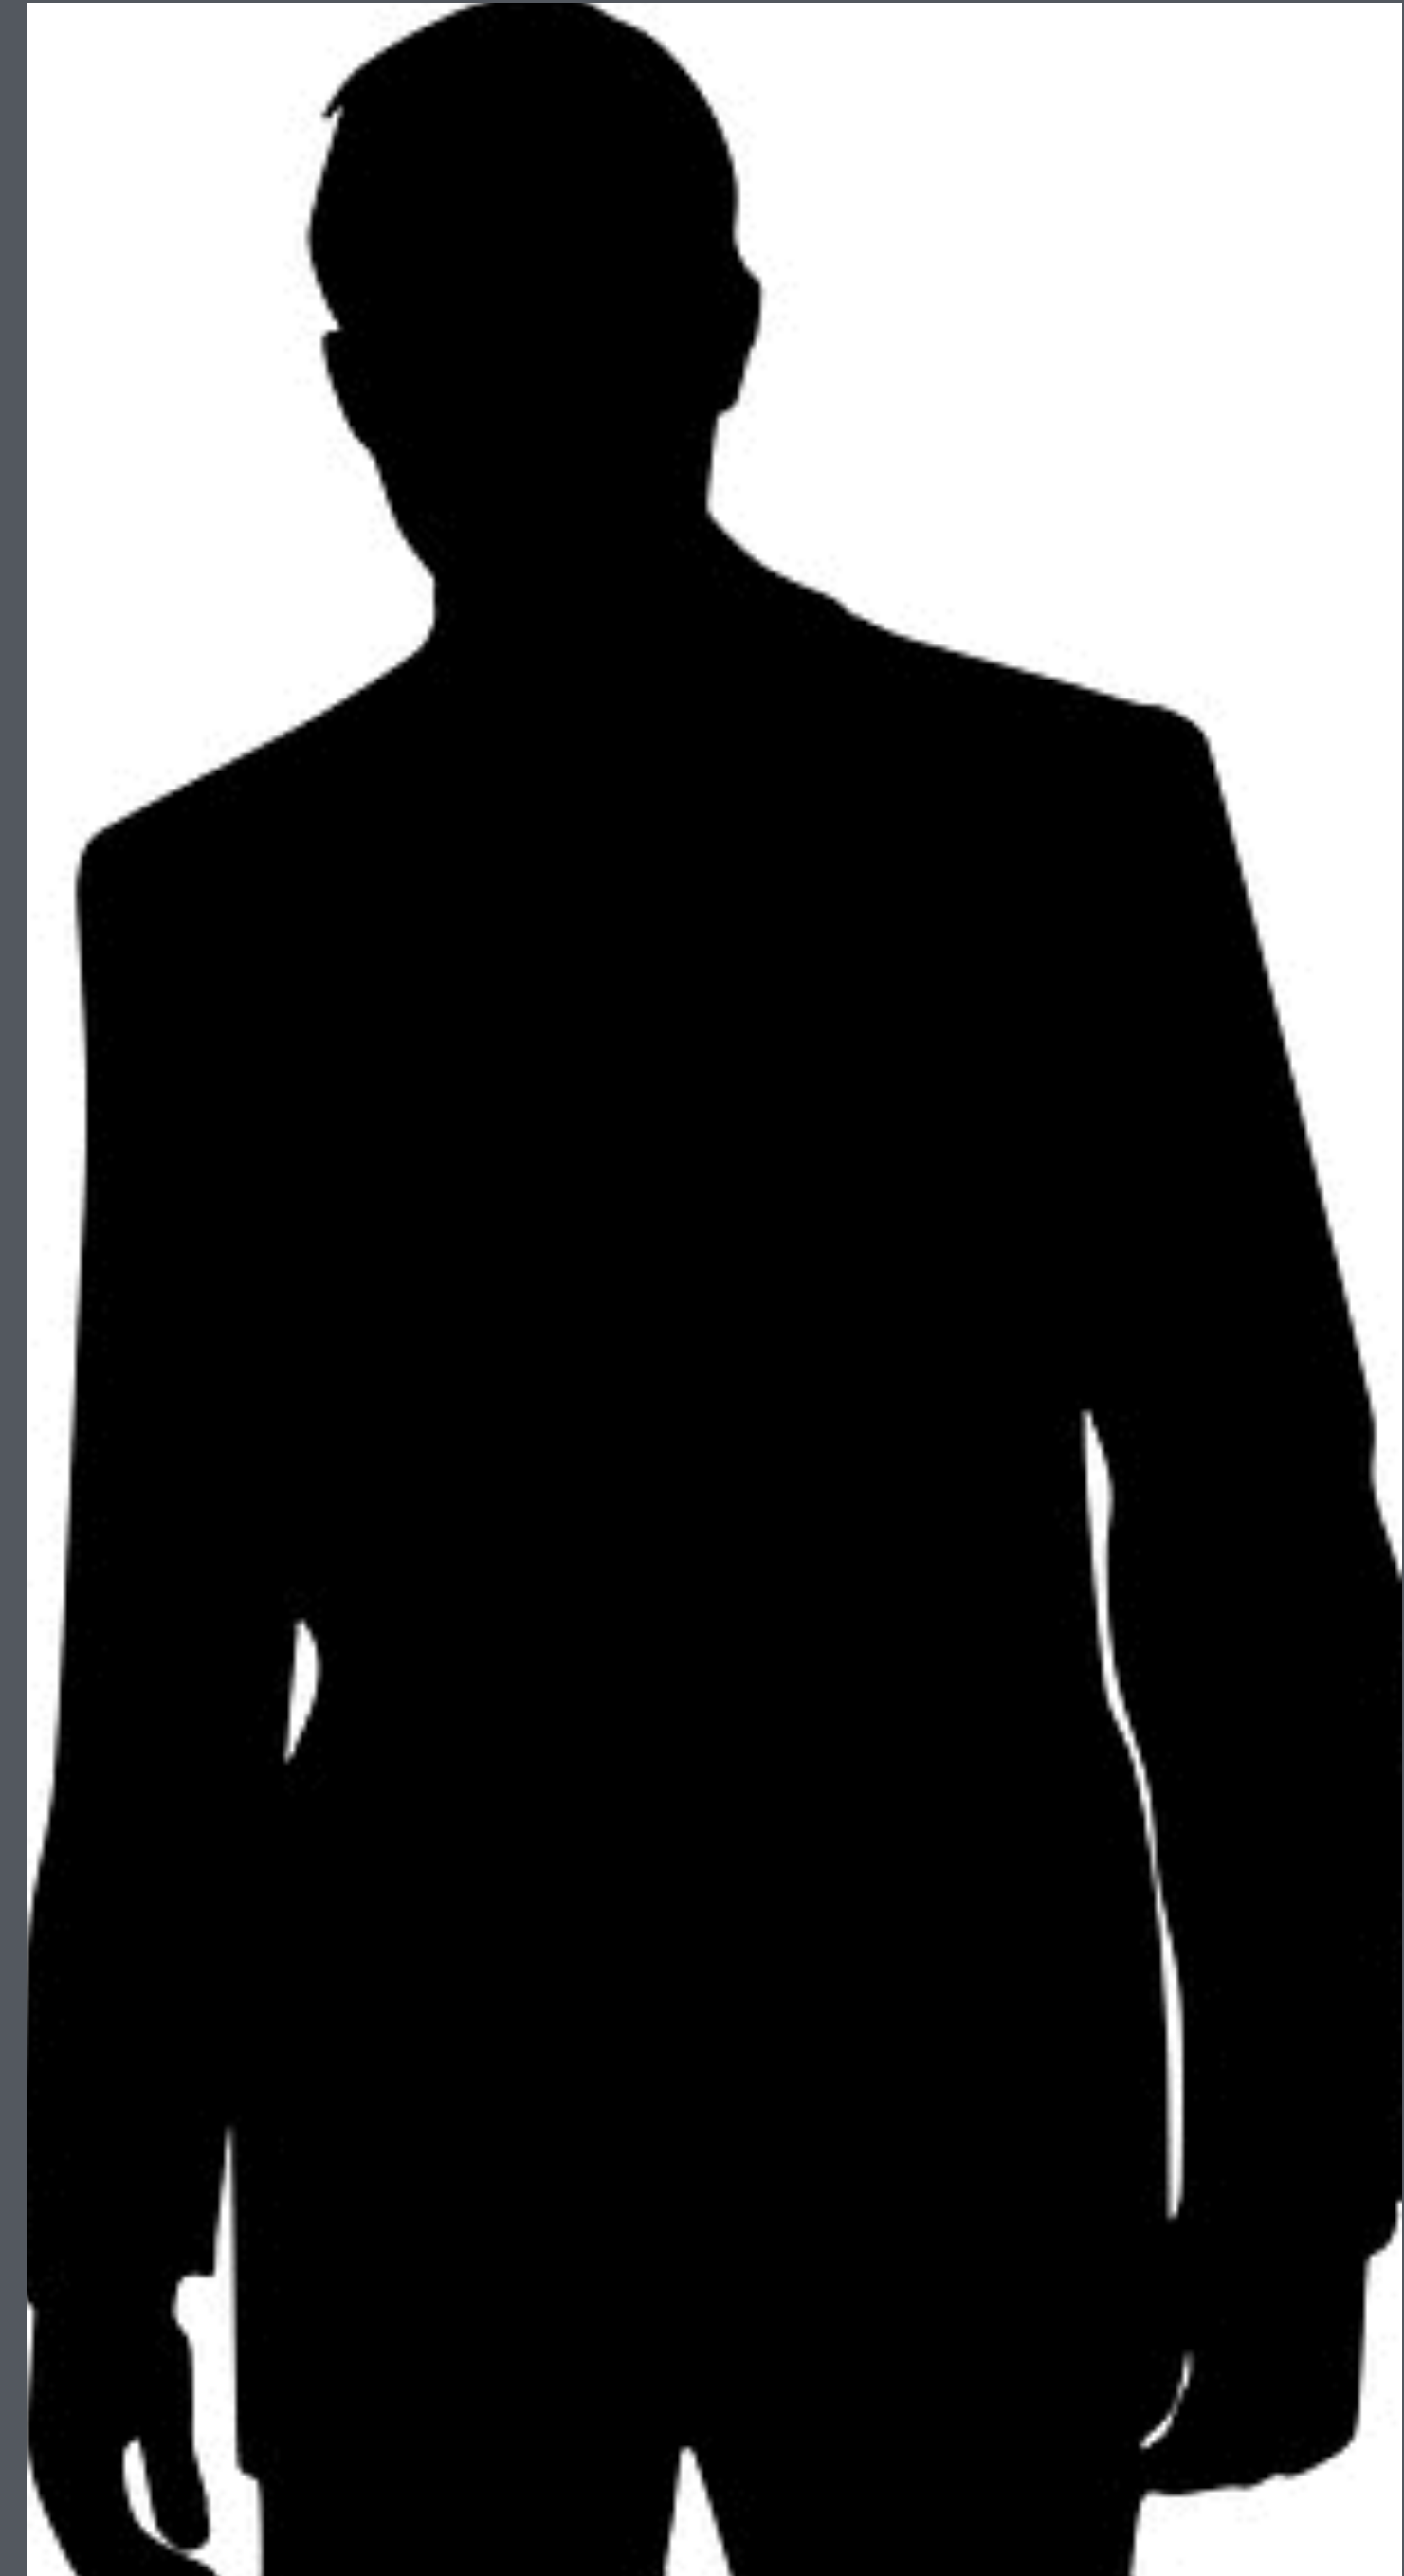

- Multi-stakeholder collaboration
- Constructive engagement
- Working across entire contracting chain
- User friendly data
- Capacity building of stakeholders
- Tool development & adaptation
- Institutional mechanisms for feedback

What is open contracting?

In Mexico, the government uses open contracting to analyse current contracts.

Estándar de Contrataciones Abiertas

Visualiza y descarga los Datos Abiertos de las etapas de planeación y concurso de la Red Compartida. Durante el desarrollo del proyecto, trabajaremos junto con la Alianza para las Contrataciones Abiertas para continuar publicando datos accesibles, comparables y oportunos sobre las siguientes etapas de adjudicación, contratación e implementación, conforme estos se generen. Este proyecto es parte de un piloto para adaptar el Estándar de Datos para Contrataciones Abiertas a un modelo de alianza público privado.

Monitoring service delivery

This portal intends to make open and easily searchable the data related to public tenders and contracts of the local government (61 new municipalities). Thus, the citizens shall be able not only to see what services, works, or public purchases are being contracted, but even the amounts of money allocated to the public programs. Every call for tender will be transparently accompanied by updated additional information about the project name, type of procurement, tender deadlines, number of participating bidders, the selected offers, project status, date of financial clause, operational period of contract and payments made by the State Treasury Office for each public service or public work.

Implementing Agency

Bisaunimod Haramtari
User Committee

Govt. Department

Government of Nepal
Ministry of State
Administration and Road
Department

The purpose of this project was to rebuild an old road and to build an extra drainage channel alongside the road to deal with people's household waste. The road goes between the villages Bisaunimod and Haramtari. It also connects local people to an important market in Kalimati village, and important government offices in Gorkha district. Before this project there was only one drainage canal at the side of the road. As a result, in the rainy season liquid waste from latrines used to be flow on the road making it unhygienic for people to travel on

The project was monitored by **Cahurast**

Monitoring implementation of contracts is key to ensure roads are built.

A world map with a dark grey background. Several countries are highlighted in different colors: blue (USA, Canada, Chile), yellow (UK, Mexico, Colombia, Brazil, India, South Africa, Indonesia, Philippines), and magenta (Russia, Nigeria, South Africa).
